

Technical data sheet

SuperCap rotary actuator with emergency control function and extended functionalities in the IP66 protective housing for adjusting dampers in technical building installations and in laboratories

- Air damper size up to approx. 8 m²
- Nominal torque 40 Nm
- Nominal voltage AC/DC 24 V
- Control Open-close
- Design life SuperCaps: 15 years
- Optimum weather protection for use outdoors (for use in ambient temperatures up to -40°C, there is a separate actuator available with built-in heater ex works)

Technical data

Electrical data	Nominal voltage	AC/DC 24 V	
	Nominal voltage frequency	50/60 Hz	
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V	
	Power consumption in operation	11 W	
	Power consumption in rest position	3 W	
	Power consumption for wire sizing	21 VA	
	Connection supply / control	Cable 1 m, 3 x 0.75 mm ² (halogen-free)	
	Parallel operation	Yes (note the performance data)	
Functional data	Torque motor	Min. 40 Nm	
i unononui uutu	Setting emergency setting position (POP)	0100%, adjustable in increments of 10% (POP rotary knob on 0 corresponds to left end stop)	
	Bridging time (PF)	2 s	
	Direction of motion motor	Selectable with switch 0 (ccw rotation) / 1 (cw rotation)	
	Direction of motion emergency control function	Selectable with switch 0100%	
	Manual override	Gear disengagement with push-button (under protective housing)	
	Angle of rotation	Max. 95°	
	Angle of rotation note	can be limited on both sides with adjustable mechanical end stops	
	Running time motor	150 s / 90°	
	Running time emergency control position	35 s / 90°	
	Running time emergency setting position note	<35 s @ 050°C	
	Sound power level motor	52 dB(A)	
	Sound power level emergency control position	61 dB(A)	
	Spindle driver	Universal spindle clamp 1426.7 mm	
	Position indication	Mechanical	
Safety	Protection class IEC/EN	III Safety extra-low voltage	
	Protection class UL	UL Class 2 Supply	
	Degree of protection IEC/EN	IP66	
	Degree of protection NEMA/UL	NEMA 4, UL Enclosure Type 4	
	EMC	CE according to 2004/108/EC	
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14	
	Certification UL	cULus according to UL 60730-1A, UL 60730-2-	
		14 and CAN/CSA E60730-1:02	
	Mode of operation	Type 1.AA	
	Rated impulse voltage supply / control	0.8 kV	
	Control pollution degree	4	
	Ambient temperature	-3050°C	
	Ambient temperature note	-4050°C for actuator with integrated heating	
	Non-operating temperature	-4080°C	
	Ambient humidity	100% r.h.	
	Maintenance	Maintenance-free	

RobustLine SuperCap actuator, IP66, Open-close, AC/DC 24 V, 40 $\rm Nm$

Product features	The sector is realized and			
Fields of application	protected against the follo - UV radiation - rain / snow - dirt / dust - Humidity - Changing atmosphere / f (recommendation: use the	y suitable for utilisation in outdoor applications and is wing weather conditions: requent and severe temperature fluctuations e actuator with integrated factory-installed heating which car prevent internal condensation)		
Mode of operation	as the integrated capacito	amper to the desired operating position at the same time rs are charged. Interrupting the supply voltage causes the k into the emergency setting position (POP) by means of		

Product features

Pre-charging time (start up)

The capacitor actuators require a pre-charging time. This time is used for charging the capacitors up to a usable voltage level. This ensures that, in the event of an electricity interruption, the actuator can move at any time from its current position into the preset emergency setting position (POP). The duration of the pre-charging time depends mainly on how long the power was interrupted.

[s] = Pre-charging time in seconds **Delivery condition (capacitors)** The actuator is completely discharged after delivery from the factory, which is why the actuator requires approximately 20 s pre-charging time before initial commissioning in order to bring the capacitors up to the required voltage level. Simple direct mounting Simple direct mounting on the damper spindle with an universal spindle clamp, supplied with an anti-rotation device to prevent the actuator from rotating. Manual override Manual control with push-button possible - temporary. The gear is disengaged and the actuator decoupled for as long as the button is pressed. The housing cover must be removed for manual override. High functional reliability The actuator is overload protected, requires no limit switches and automatically stops when the end stop is reached. Adjustable angle of rotation Adjustable angle of rotation with mechanical end stops. **Direction of rotation switch** When actuated, the direction of rotation switch changes the running direction in normal operation. The direction of rotation switch has no influence on the emergency setting position (POP) which has been set. **Emergency setting position (POP)** The rotary knob «Emergency setting position» can be used to adjust the desired emergency setting position (POP). The POP range is always in reference to the rotary knob maximum angle of rotation of the actuator. The rotary knob always refers to an angle of rotation range of 95° and does not take into account any retroactively adjusted end stops. In the event of an electricity interruption, the actuator will move into the selected emergency setting position (POP), taking into account the bridging time (PF) of 2 s which is set ex-works.

Accessories

	Description	Туре	
Electrical accessories	Auxiliary switch, add-on, 1 x SPDT	S1A	
	Auxiliary switch, add-on, 2 x SPDT	S2A	
	Feedback potentiometer 140 Ohm, add-on	P140A	
	Feedback potentiometer 200 Ohm, add-on	P200A	
	Feedback potentiometer 500 Ohm, add-on	P500A	
	Feedback potentiometer 1 kOhm, add-on	P1000A	
	Feedback potentiometer 2.8 kOhm, add-on	P2800A	
	Feedback potentiometer 5 kOhm, add-on	P5000A	
	Feedback potentiometer 10 kOhm, add-on	P10000A	
	Description	Туре	
echanical accessories	Cable gland, for cable diameter 4-10	Z-KB-PG11
