

Modulating spring-return actuator with emergency control function for adjusting dampers in technical building installations

- · Air damper size up to approx. 2 m²
- Nominal torque 10 Nm
- Nominal voltage AC/DC 24 V
- Control modulating DC (0)2...10 V
- Position feedback DC 2...10 V
- with 2 integrated auxiliary switches
- Optimum weather protection for use outdoors (for use in ambient temperatures up to -40°C, there is a separate actuator available with built-in heater ex works)

Technical data

_	lectri	2	_~	211

Nominal voltage	AC/DC 24 V
Nominal voltage frequency	50/60 Hz
Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
Power consumption in operation	3.5 W
Power consumption in rest position	2.5 W
Power consumption for wire sizing	5.5 VA
Auxiliary switch	2 x SPDT, 1 x 10% / 1 x 1190%
Switching capacity auxiliary switch	1 mA3 (0.5 inductive) A, AC 250 V
Connection supply / control	Cable 1 m, 4 x 0.75 mm ² (halogen-free)
Connection auxiliary switch	Cable 1 m, 6 x 0.75 mm ² (halogen-free)
Parallel operation	Yes (note the performance data)
Torque motor	Min. 10 Nm
Torque spring return	Min 10 Nm

Functional data

Connection auxiliary switch	Cable 1 m, 6 x 0.75 mm² (nalogen-free)
Parallel operation	Yes (note the performance data)
Torque motor	Min. 10 Nm
Torque spring return	Min. 10 Nm
Positioning signal Y	DC 010 V
Positioning signal Y note	Input impedance 100 kΩ
Operating range Y	DC 210 V
Position feedback U	DC 210 V
Position feedback U note	Max. 0.5 mA
Position accuracy	±5%
Direction of motion motor	selectable with switch L / R
Direction of motion emergency control function	L (ccw)
Manual override	by means of hand crank and locking switch
Angle of rotation	Max. 95°
Angle of rotation note	adjustable starting at 33% in 2.5% steps (with mechanical end stop)
Running time motor	150 s / 90°
Running time emergency control position	<20 s / 90°
Running time emergency setting position note	<20 s @ -2050°C / <60 s @ -30°C
Sound power level motor	40 dB(A)
Spindle driver	Universal spindle clamp 1226.7 mm
Position indication	Mechanically, pluggable
Service life	Min. 60,000 emergency positions

Safety

Spindle driver	Universal spindle clamp 1226.7 mm
Position indication	Mechanically, pluggable
Service life	Min. 60,000 emergency positions
Protection class IEC/EN	III Safety Extra-Low Voltage (SELV)
Protection class UL	UL Class 2 Supply
Protection class auxiliary switch IEC/EN	II reinforced insulation
Degree of protection IEC/EN	IP66
Degree of protection NEMA/UL	NEMA 4, UL Enclosure Type 4
EMC	CE according to 2014/30/EU
Low voltage directive	CE according to 2014/35/EU
Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
Certification UL	cULus according to UL 60730-1A, UL 60730-2- 14 and CAN/CSA E60730-1:02
Mode of operation	Type 1.AA.B
Rated impulse voltage supply / control	0.8 kV
Rated impulse voltage auxiliary switch	2.5 kV
Control pollution degree	4

Spring-return actuator, IP66, modulating, AC/DC 24 V, 10 Nm, with 2 integrated auxiliary switches

Technical data Safety Ambient temperature -30...50°C Ambient temperature note -40...50°C for actuator with integrated heating Non-operating temperature -40...80°C Ambient humidity 100% r.h. Maintenance Maintenance-free Weight Weight 5.1 kg

Safety notes

- The device must not be used outside the specified field of application, especially not in aircraft or in any other airborne means of transport.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- Junction boxes must at least correspond with enclosure IP degree of protection!
- The cover of the protective housing may be opened for adjustment and servicing.
 When it is closed afterwards, the housing must seal tight (see installation instructions).
- The device may only be opened in the manufacturer's factory. It does not contain any parts that can be replaced or repaired by the user.
- The cables must not be removed from the device installed in the interior.
- To calculate the torque required, the specifications supplied by the damper manufacturers concerning the cross-section, the design, the installation site and the ventilation conditions must be observed.
- The two switches integrated in the actuator are to be operated either on power supply voltage or at safety extra-low voltage. The combination power supply voltage/ safety extra-low voltage is not permitted.
- The device contains electrical and electronic components and must not be disposed
 of as household refuse. All locally valid regulations and requirements must be
 observed.
- The actuator is not designed for applications where chemical influences (gases, fluids) are present or for utilisation in corrosive environments in general.
- The actuator may not be used in plenary applications (e.g. suspended ceilings or raised floors).
- The materials used may be subjected to external influences (temperature, pressure, construction fastening, effect of chemical substances, etc.), which cannot be simulated in laboratory tests or field trials. In case of doubt, we definitely recommend that you carry out a test. This information does not imply any legal entitlement. Belimo will not be held liable and will provide no warranty.
- If cables which are not authorised for UL (NEMA) Type 4 applications are guided out
 of the unit, then flexible metallic cable conduits or suitable threaded cable conduits
 of equal value are to be used.
- flexible metallic cable conduits or threaded cable conduits of equal value are to be used for UL (NEMA) Type 4 applications.

Product features

Fields of application

The actuator is particularly suitable for utilisation in outdoor applications and is protected against the following weather conditions:

- UV radiation
- rain / snow
- dirt / dust
- Humidity
- Changing atmosphere / frequent and severe temperature fluctuations (recommendation: use the actuator with integrated factory-installed heating which can be ordered separately to prevent internal condensation)

Mode of operation

The actuator is connected with a standard modulating signal of DC 0 ... 10 V and moves the damper to the operating position at the same time as tensioning the return spring. The damper is turned back to the emergency position by spring force when the supply voltage is interrupted.

Simple direct mounting

Simple direct mounting on the damper spindle with an universal spindle clamp, supplied with an anti-rotation device to prevent the actuator from rotating.

Spring-return actuator, IP66, modulating, AC/DC 24 V, 10 Nm, with 2 integrated auxiliary switches

Product features

Manual override By using the hand crank the damper can be actuated manually and engaged with the

locking switch at any position. Unlocking is carried out manually or automatically by

applying the operating voltage.

The housing cover must be removed for manual override.

Adjustable angle of rotation Adjustable angle of rotation with mechanical end stops.

High functional reliability The actuator is overload protected, requires no limit switches and automatically stops

when the end stop is reached.

Flexible signalization The actuator has one auxiliary switch with a fixed setting and one adjustable auxiliary

switch. They permit a 10% or 11...90% angle of rotation to be signaled.

The housing cover must be removed to set the auxiliary switch.

Accessories

	Description	Туре
Electrical accessories	Auxiliary switch, 2 x SPDT	S2A-F
	Feedback potentiometer, 200 Ohm, incl. installation accessories	P200A-F
	Feedback potentiometer 1 kOhm, incl. installation accessories	P1000A-F
	Signal converter voltage/current, supply AC/DC 24V	Z-UIC
	Digital position indicator for front-panel mounting, 099%, front mass $72 \times 72 \text{ mm}$	ZAD24
	Range controller for wall mounting, adjustable electron. Min./max. angle of rotation limitation	SBG24
	Positioner for wall mounting, range 0100%	SGA24
	Positioner in a conduit box, range 0100%	SGE24
	Positioner for front-panel mounting, range 0100%	SGF24
	Positioner for wall mounting, range 0100%	CRP24-B1
	Description	Туре
Mechanical accessories	Cable gland, for cable diameter 4-10 mm	Z-KB-PG11

- Combination with auxiliary switch only on request. Please contact your Belimo representative!
- Combination with feedback potentiometer only on request. Please contact your Belimo representative!

Electrical installation

Notes

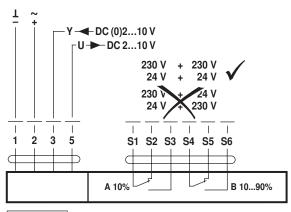

- Connection via safety isolating transformer.
- Parallel connection of other actuators possible. Observe the performance data.

Operating controls and indicators

Auxiliary switch settings

Note

Perform settings on the actuator only in deenergised state.

Manual override

Turn the hand crank until the desired switching position is set.

2 Spindle clamp

Edge line (A) displays the desired switching position of the actuator on the scale.

3 Fasten the locking device

Turn the locking switch to the "Locked padlock" symbol.

4 Auxiliary switch

Turn rotary knob until the notch points to the arrow symbol.

5 Unlock the locking device

Turn the locking switch to the "Unlocked padlock" symbol or unlock with the hand crank.

6 Cable

Connect continuity tester to S4 + S5 or to S4 + S6.

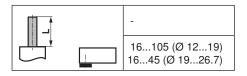

Manual override

Turn the hand crank until the desired switching position is set and check whether the continuity tester shows the switching point.
