

Communicative globe valve actuator for 2-way and 3-way globe valves

- · Actuating force 1000 N
- Nominal voltage AC/DC 24 V
- Control modulating, communicative 2...10 V variable
- · Stroke 20 mm
- · Conversion of sensor signals
- · Communication via Belimo MP-Bus

RETRO FIT

echnical data		
Floativical data	Neminal valtage	AC/DC 24 V
Electrical data	Nominal voltage	
	Nominal voltage frequency	50/60 Hz
	Nominal voltage range	AC 19.228.8 V / DC 21.628.8 V
	Power consumption in operation	3.5 W
	Power consumption in rest position	1.5 W
	Power consumption for wire sizing	5.5 VA
	Connection supply / control	Terminals 4 mm ² (cable Ø410 mm)
	Parallel operation	Yes (note the performance data)
Functional data	Actuating force motor	1000 N
	Communicative control	MP-Bus
	Operating range Y	210 V
	Input Impedance	100 kΩ
	Options positioning signal	Open/close
		3-point (AC only)
		Modulating (DC 032 V)
	Operating range Y variable	Start point 0.530 V
		End point 2.532 V
	Position feedback U	210 V
	Position feedback U note	Max. 0.5 mA
	Position feedback U variable	Start point 0.58 V
		End point 2.510 V
	Position accuracy	±5%
	Manual override	with push-button, can be locked
	Stroke	20 mm
	Running time motor	35 s / 20 mm
	Running time motor variable	3590 s
	Adaptation setting range	manual (automatic on first power-up)
	Adaptation setting range variable	No action
	ridapianon ootiing rango vanabio	Adaptation when switched on
		Adaptation after pushing the gear
		disengagement button
	Override control	MAX (maximum position) = 100%
		MIN (minimum position) = 0%
		ZS (intermediate position, AC only) = 50%
	Override control variable	MAX = (MIN + 33%)100%
		MIN = 0%(MAX - 33%)
		ZS = MINMAX
	Sound power level, motor	60 dB(A)
	Position indication	Mechanically, 520 mm stroke
Safety	Protection class IEC/EN	III Safety Extra-Low Voltage (SELV)
Salety	Protection class UL	UL Class 2 Supply
	Degree of protection IEC/EN	IP54
		NEMA 2
	Degree of protection NEMA/UL	
	Enclosure	UL Enclosure Type 2
	EMC	CE according to 2014/30/EU
	Certification IEC/EN	IEC/EN 60730-1 and IEC/EN 60730-2-14
	Certification UL	cULus according to UL60730-1A, UL60730-2-

14 and CAN/CSA E60730-1:02

Globe valve actuator (Retrofit), modulating, communicative, AC/DC 24 V, 1000 N, Running time motor 35 s

Technical data

Safety	Certification UL note	The UL marking on the actuator depends on the
		production site, the device is UL-compliant in
		any case
	Mode of operation	Type 1
	Rated impulse voltage supply / control	0.8 kV
	Control pollution degree	3
	Ambient temperature	050°C
	Storage temperature	-4080°C
	Ambient humidity	Max. 95% r.H., non-condensing
	Servicing	maintenance-free
Weight	Weight	1.8 kg

Safety notes

- This device has been designed for use in stationary heating, ventilation and airconditioning systems and must not be used outside the specified field of application, especially in aircraft or in any other airborne means of transport.
- Outdoor application: only possible in case that no (sea) water, snow, ice, insolation
 or aggressive gases interfere directly with the actuator and that is ensured that the
 ambient conditions remain at any time within the thresholds according to the data
 sheet.
- Only authorised specialists may carry out installation. All applicable legal or institutional installation regulations must be complied during installation.
- The switch for changing the direction of motion and so the closing point may be adjusted only by authorised specialists. The direction of motion is critical, particularly in connection with frost protection circuits.
- The device may only be opened at the manufacturer's site. It does not contain any
 parts that can be replaced or repaired by the user.
- The device contains electrical and electronic components and must not be disposed
 of as household refuse. All locally valid regulations and requirements must be
 observed.

Product features

Mode of operation

Conventional operation:

The actuator is connected with a standard modulating signal of 0...10 V and drives to the position defined by the positioning signal. The measuring voltage U serves for the electrical display of the actuator position 0.5...100% and as slave control signal for other actuators.

Operation on Bus:

The actuator receives its digital positioning signal from the higher level controller via the MP-Bus and drives to the position defined. Connection U serves as communication interface and does not supply an analogue measuring voltage.

Converter for sensors

Connection option for a sensor (passive or active sensor or switching contact). The MP actuator serves as an analogue/digital converter for the transmission of the sensor signal via MP-Bus to the higher level system.

Parametrisable actuators

The factory settings cover the most common applications. Single parameters can be modified with the Belimo Service Tools MFT-P or ZTH EU.

Installation on third-party valves

The retrofit actuators for installation on a wide range of valves from various manufacturers are comprised of an actuator, bracket, universal valve neck adapter and universal valve stem adapter. Adapt the valve neck and valve stem to begin with, then attach the retrofit bracket to the valve neck adapter. Now fit the retrofit actuator into the bracket and connect it to the valve. Whilst taking the position of the valve closing point into account, secure the actuator to the bracket and then conduct the commissioning process. The valve neck adapter/actuator can be rotated through 360° on the valve neck, provided it is permitted by the size of the installed valve.

Installation on Belimo valves

Use standard actuators from Belimo for mounting on Belimo globe valves. The installation of retrofit actuators on Belimo globe valves is technically possible.

NVC24A-MP-RE

Globe valve actuator (Retrofit), modulating, communicative, AC/DC 24 V, 1000 N, Running time motor 35 s

Product features

Manual override Manual override with push-button possible (the gear is disengaged for as long as the

button is pressed or remains locked).

The stroke can be adjusted by using a hexagon socket screw key (4 mm), which is inserted into the top of the actuator. The stroke shaft extends when the key is rotated

clockwise.

High functional reliability The actuator is overload protected, requires no limit switches and automatically stops

when the end stop is reached.

Position indication The stroke is indicated mechanically on the bracket with tabs. The stroke range

adjusts itself automatically during operation.

Home position Factory setting: Actuator spindle is retracted.

The first time the supply voltage is switched on, i.e. at the time of commissioning, the actuator carries out an adaption, which is when the operating range and position

feedback adjust themselves to the mechanical setting range.

The actuator then moves into the position defined by the positioning signal.

Setting direction of stroke When actuated, the stroke direction switch changes the running direction in normal

operation.

Adaption and synchronisation An adaption can be triggered manually by pressing the "Adaption" button or with the

PC-Tool. Both mechanical end stops are detected during the adaption (entire setting

range).

Automatic synchronisation after pressing the gearbox disengagement button is

configured. The synchronisation is in the home position (0%).

The actuator then moves into the position defined by the positioning signal.

A range of settings can be adapted using the PC-Tool (see MFT-P documentation)

Electrical installation

Notes

- · Connection via safety isolating transformer.
- Parallel connection of other actuators possible. Observe the performance data.
- Direction of stroke switch factory setting: Actuator spindle retracted (▲).

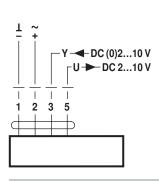

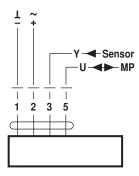

Electrical installation

Wiring diagrams

AC/DC 24 V, modulating

Operation on the MP-Bus

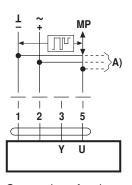

Functions

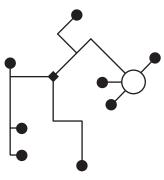

Functions when operated on MP-Bus

Connection on the MP-Bus

A) more actuators and sensors (max.8)

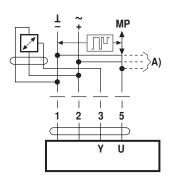

MP-Bus Network topology

There are no restrictions for the network topology (star, ring, tree or mixed forms are permitted). Supply and communication in one and the same 3-wire cable

- no shielding or twisting necessary
- · no terminating resistors required

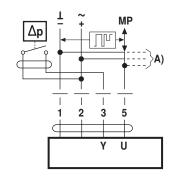

Connection of active sensors

A) more actuators and sensors (max.8)

- Supply AC/DC 24 V
- Output signal DC 0...10 V (max. DC 0...32 V)
- Resolution 30 mV

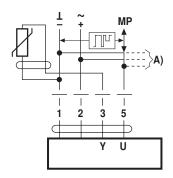

Connection of external switching contact

A) more actuators and sensors (max.8)

- Switching current 16 mA @ 24 V
- Start point of the operating range must be parameterised on the MP actuator as \geq 0.5 V

Connection of passive sensors

Ni1000	–28+98°C	8501600 Ω ²⁾
PT1000	−35+155°C	8501600 Ω ²⁾
NTC	-10+160°C 1)	200 Ω60 kΩ ²)

A) more actuators and sensors (max.8)

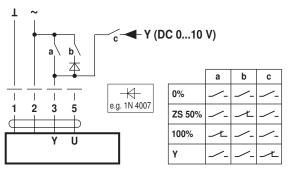

- 1) Depending on the type
- 2) Resolution 1 Ohm

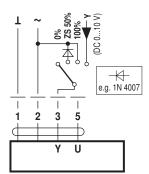

Functions

Functions with basic values (conventional mode)

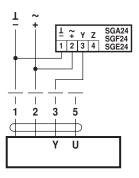

Override control with AC 24 V with relay contacts

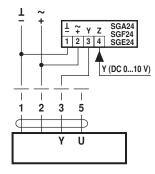

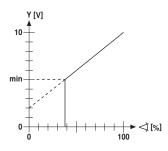

Override control with AC 24 V with rotary switch

Control remotely 0...100% with Minimum limit with positioner SG... positioner SG..

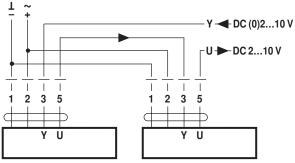

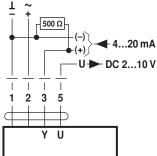

Follow-up control (position-dependent)

Control with 4...20 mA via external resistor

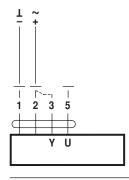

Caution:

The operating range must be set to DC 2...10 V.

The 500 Ω resistor converts the 4...20 mA current signal to a voltage signal DC 2...10 V

Functional check

Procedure

- 1. Apply 24 V to connection 1 and 2
- 2. Disconnect connection 3:
- with upwards direction of motion: closing point at top
- with downwards direction of motion: closing point at bottom
- 3. Short circuit connections 2 and 3:
- Actuator runs in the opposite direction

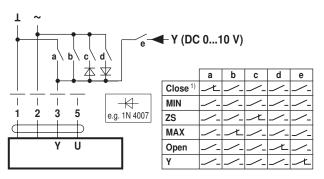

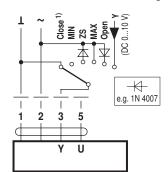

Functions

Functions for devices with specific parameters (Parametrisation necessary)

Override control and limiting with AC 24 V with relay contacts

Override control and limiting with AC 24 V with rotary switch

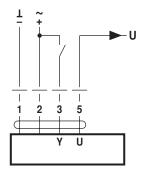

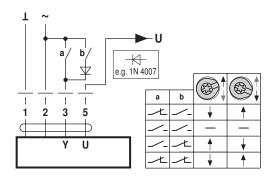

1) **Caution:** This function is only guaranteed if the start point of the operating range is defined as min. 0.5 V.

Control open/close

Control 3-point

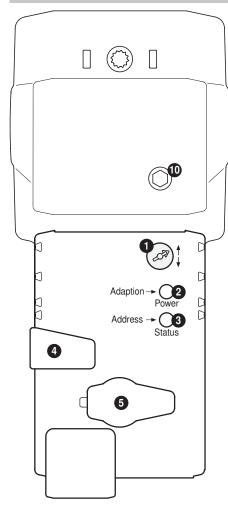

Globe valve actuator (Retrofit), modulating, communicative, AC/DC 24 V, 1000 N, Running time motor 35 s

Operating controls and indicators

Direction of stroke switch

Switch over: Direction of stroke changes

2 Push-button and LED display green

Off: No power supply or malfuntion

On: In operation

Press button: Triggers stroke adaptation, followed by standard mode

3 Push-button and LED display yellow

Off: Standard mode

Flickering: MP communication active On: Adaptation process active

Flashing: Request for addressing from MP master

Press button: Confirmation of the addressing

4 Gear disengagement button

Press button: Gear disengages, motor stops, manual override possible

Release button: Gear engages, standard mode

5 Service plug

For connecting parameterisation and service tools

Manual override

Clockwise: Actuator spindle extends
Counterclockwise: Actuator spindle retracts

Check power supply connection

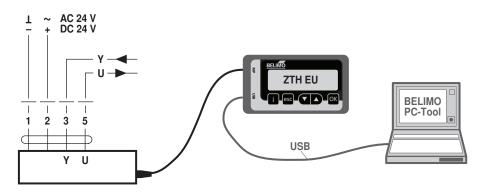

2 Off and 3 On Possible wiring error in power supply

Service

Service Tools connection

The actuator can be parametrised by ZTH EU via the service socket. For an extended parametrisation the PC tool can be connected.

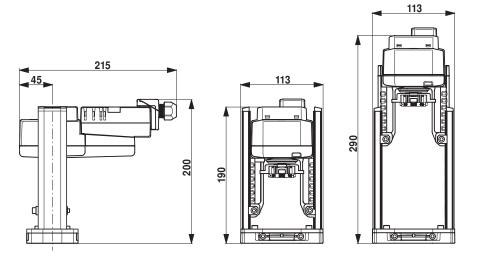

Connection ZTH EU / PC-Tool
